

List of Machinery and Their Functions of Apparel Industry

Various types of machine use in the apparel industry from Warehouse to finishing. In this article, you will get a list of machinery and their functions of apparel industry. Hopefully, this list of all the machinery of the apparel industry with their uses will help you to understand the different machine functions. This list contains *all types of Garments machinery*.

List of Machine Used in Garments Factory

1. Fabrics inspection machine
2. Plotter printing machine
3. Cutting machine
4. Fusing machine
5. Embroidery machine
6. Sewing machine
7. Thread Trimmer machine
8. Thread sucking machine
9. Iron machine
10. Pull test machine
11. Metal detector machine
12. Barcode scanning machine
13. Heat seal joining machine
14. Case label printing machine
15. Moisture checking machine
16. Digital Hygrometer
17. Air compressor machine
18. Boiler machine
19. Generator
20. Water pump

Functions of Machinery Used in Garments

SL	Name of Machine	Functions of Machine	Using department
1	Fabrics inspection machine	Use to do fabrics inspection to check fabrics defects	Fabrics inspection
2	Plotter printing machine	Print Garments marker	CAD
3	Cutting machine	Cut fabrics as per marker	Cutting
4	Fusing machine	Fuse interlining	Fusing-Sewing
5	Embroidery machine	To set Embroidery in garments	Embroidery
6	Sewing machine	Sew garments	Sewing
7	Thread Trimmer machine	Thread trimming of garments uncut thread	Finishing
8	Thread sucking machine	Reduce loose and unnecessary thread from garments.	Finishing
9	Iron machine	Pressing garments to get good appearances	Finishing
10	Pull test machine	To determine the pulling strength of any type of button	Finishing
11	Metal detector machine	o get a metal-free final product in carton	Packing and Finishing
12	Barcode scanning machine	Scan sticker and ticketing of garments	Finishing
13	Heat seal joining machine	Set up heat seal label in Garments	Finishing
14	Case label printing machine	Print case label of garments carton	Merchandising-Packing
15	Moisture checking machine	Find out moisture percentage of finished garments	Packing
16	Digital Hygrometer	Determine RH% for every section	All section-specially warehouse
17	Air compressor machine	Produce compressed air for machine and maintenance dept.	Utility section
18	Boiler machine	Generate hot steam for Iron machine	Utility section
19	Generator	Produce electricity	Utility section
20	Water pump	Pick water for factory	Utility section
