

Garments Test Requirements of Buyer

To ensure **consumer product safety, wearability, garments quality, strength** and others requirement of buyer, garments test is done as a buyer requirement. The test is conducted in full garments form not in fabrics form, safety is very much important for children garments. The garments test is done in buyer laboratory or in third-party laboratories or any nominated laboratories. The main objective of garments is to check consumer right and safety of a product, which is ensured by the test report. Garments test report is mandatory for every garments lot, without passing it shipment is not allowed. Garments testing criteria may little bit vary buyer to buyer but it is a mandatory requirement for all garments manufacturer. So as a garments maker you need to be careful about all garments test requirements of buyer otherwise you may lose your valuable customer.

List of Test Required for Garments

For your better understanding, I made a list of test normally required for garments which are asked by the garments buyers.

1. Fiber content
2. Care instruction
3. Dimensional Stability To Home Laundering
4. Distortion After Washing
5. Appearance After 3 Washes
6. Fabric Weight
7. Tensile Strength
8. Tear Strength
9. Seam Strength / Slippage
10. Color Fastness To Crocking
11. Color Fastness To Ozone

12. pH Value
13. Dimensional Stability To Home Laundering
14. Distortion After Washing
15. Appearance After Washing
16. Falling-Pendulum Type (Digital Elmendorf) Tester
17. Colorfastness To Crocking
18. Colorfastness To Ozone
19. pH of The Water-Extract from Wet Processed Textiles
20. Restricted substance list
21. Sharp materials

Hopefully, this information will be helpful, If you need any detail information then please let me know. I will try to give your required information.
